

# Safeguarding Children's Dignity Online During the COVID-19 PANDEMIC

Arigatou International is committed to raising awareness about child safety online which has become a larger threat in light of the COVID-19 pandemic with so many millions of children out of school and spending more hours online.

This webinar will provide a platform for discussion between the experts and children members of GNRC's Youth Committee on the current threats and challenges children are facing in the context of COVID-19 while they navigate in the digital world. It will also include recommendations for religious communities and civil society to take action towards online safety for children.
